¹ Some primary and backup CubeSats were not ready for this launch, so these three optical calibration CubeSats were just mass models with different coatings on the outside.

² All satellites on these two deployments were brought to the station by the HTV-5, launched on 19 August 2015. SERPENS and S-CUBE were deployed by the J-SSOD deployer in Mid September, the other satellites were deployed from the NRCSD in the beginning of October.

³ Two Flock-2b satellites were stuck in a NRCSD deployer and brought back down to earth.
